

Vercel Deployment Issue - 404 Error

Problem

The website is returning a 404 error because Vercel cannot find the deployment.

Root Cause

The Vercel project may not be properly connected to the GitHub repository, or there's a configuration issue preventing automatic deployments.

Solution Steps

Option 1: Redeploy via Vercel Dashboard (RECOMMENDED)

1. **Go to Vercel Dashboard:** <https://vercel.com/dashboard>
2. **Find your project:** "natures-way-soil" or "coplit-built"
3. **Click on the project**
4. **Go to "Deployments" tab**
5. **Click "Redeploy" on the latest deployment**
6. **OR click "Deploy" button and select the main branch**

Option 2: Check Project Settings

1. **Go to Project Settings** in Vercel dashboard
2. **Check "Git" section:**
 - Ensure it's connected to: `natureswaysoil/coplit-built`
 - Branch should be: `main`
 - Auto-deploy should be: **Enabled**
3. **Check "Build & Development Settings":**
 - Framework Preset: **Next.js**
 - Build Command: `next build`
 - Output Directory: `.next`
 - Install Command: `npm install`

Option 3: Reconnect GitHub Repository

If the above doesn't work:

1. **Go to Project Settings > Git**
2. **Disconnect the repository**
3. **Reconnect it** by selecting the correct repository
4. **Trigger a new deployment**

Option 4: Create New Vercel Project

If nothing else works:

1. **Go to Vercel Dashboard**
2. **Click "Add New..." > Project**

3. **Import from GitHub:** Select `natureswaysoil/coplit-built`

4. **Configure:**

- Framework: Next.js
- Root Directory: `./`
- Build Command: `next build`

5. **Add Environment Variables** (if needed):

- Copy from your `.env.local` file

6. **Deploy**

What I've Done

✓ **Code is ready and working:**

- Professional homepage redesign complete
- All files committed to GitHub
- Local build successful
- No code errors

✓ **Latest commit:** `b19856c` - Complete professional homepage redesign

✗ **Vercel deployment:** Not connecting properly

Next Steps

You need to manually trigger a deployment from the Vercel dashboard since the automatic deployment isn't working.

Once you do that, the site will be live with the beautiful new design!

Quick Check

After redeploying, verify:

1. Site loads at: `https://natures-way-soil.vercel.app/`
2. You see the new hero section with garden background
3. No video section
4. Professional design with testimonials

Created: October 7, 2025

Status: Waiting for manual Vercel deployment
